

TO MAKE THE WORLD INDOORS A BETTER PLACE

CASPR CONTINUOUS AIR & SURFACE PATHOGEN REDUCTION

CASPR is an innovative “no-touch” disinfection technology that utilizes a Natural Catalytic Converter (NC²I) to create gaseous Hydrogen Peroxide out of your ambient air. Hydrogen Peroxide is nature’s natural disinfectant and CASPR recreates that same organic process indoors making it very effective against viruses, bacteria, mold, fungi, VOC’s and even odors.

CASPR units give us the opportunity to be combative from a progressive approach, treating such dangerous viruses and bacteria on the surfaces we touch and in the very air that we breathe.

By treating and destroying pathogens at the cellular level on a continuous basis CASPR eliminates the periodical approach, human error and extra labor needed to truly disinfect our indoor environment.

WHY CASPR?

- ✓ Continuous vs periodical
- ✓ Active vs reactive
- ✓ Full-facility vs limited coverage
- ✓ Automated vs operator required
- ✓ Organic vs harsh chemicals
- ✓ Safe around people, plants, and pets

CASPR DUCT-MOUNTED

CASPR DUCT-MOUNTED units are designed to be installed inside your air ducts. These systems are available in multiple sizes and can be combined to provide the proper dose of oxidizers for your space while optimizing the cost per square foot. Once installed and turned on, CASPR duct-mounted units provide continuous, automated air and surface protection for your entire facility.

CASPR COMPACT

CASPR COMPACT units are designed to be used in areas where more permanent installation is not an option. This unit also displays the versatility of the CASPR Product line as a solution to take with you where ever you may go. Equipped with its own fan, this unit will provide the proper dose up to 1,500 sq.ft. Once turned on, CASPR COMPACT units provide continuous air and surface protection for your space.

CASPR BLU TILE

CASPR BLU TILE units can be installed in any tiled ceiling and is suited for all indoor areas where people live or work. Once installed and turned on, the soft blue glow lets you, your employees and your customers know the CASPR BLU TILE is working to provide air and surface protection throughout the entire building. These units are often used in conjunction with CASPR PRO units to serve the entire facility.

CASPR TRANSIT

CASPR TRANSIT units have been specially designed for buses, trains, and other transportation vehicles. They are easy to install, low-profile, silent, tamper resistant, and available in both AC and DC power options. Once installed and turned on, CASPR TRANSIT units provide continuous air and surface protection for your entire vehicle and its passengers while in use.
